Atlas Support Tiers and Service Level Agreement

1. Support tiers

Atlas customers choose one of three support tiers. Basic support is delivered by email and the first response target is 1 business day. Business support is available 24 hours a day and guarantees a first response within 1 hour for critical issues. Enterprise support promises a first response within 15 minutes for critical issues and includes a dedicated technical account manager and a quarterly architecture review.

An issue is critical when production is unavailable or data loss is suspected. Customers can open critical tickets by phone on the Business and Enterprise tiers. Issues are escalated to engineering if they remain unresolved after 4 hours.

Atlas Support Tiers and Service Level Agreement

2. Uptime commitment and service credits

Meridian Cloud commits to a monthly uptime of 99.9% for Pro clusters. If monthly uptime falls below 99.9% but stays at or above 99.0%, the customer receives a service credit of 10% of the monthly fee. If uptime falls below 99.0%, the credit is 25%. Credits are applied to the next invoice and never paid out in cash.

Customers must request a credit within 30 days after the end of the affected month. Scheduled maintenance is excluded from the uptime calculation. Maintenance windows take place on Sundays between 02:00 and 04:00 UTC and are announced at least 7 days in advance. Outages caused by customer misconfiguration are also excluded.
